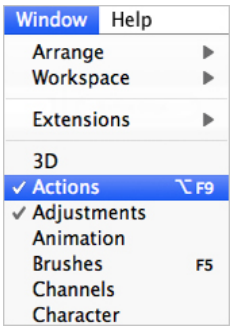
Crease iT

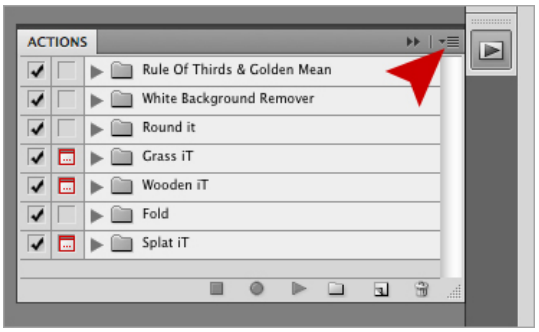
Photoshop Action

Installation

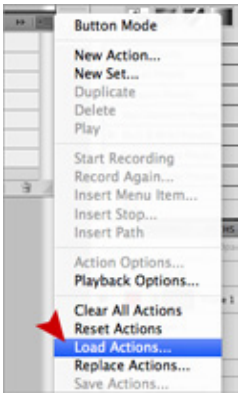
1. Load photoshop, select actions from the windows menu, this will open the actions palette.



2. Navigate to the actions palette and click the fly out menu in the top right hand corner (marked below with a red arrow).



3. From the actions palette flyout menu select load action



4. Now navigate to your action .atn file on your computer and click load.

Alternativly you can also load .atn files into photoshop cs3 and above by simply double clicking on the .atn file on your desktop, this will automatically load photoshop and the action will be ready in your actions palette.

To Use:

In Photoshop select any text, vector shape or raster pixel layer then select the Crease iT action and click the play button located in the actions palette..

There are 6 different Crease iT render settings.
