THIS PACKAGE INCLUDES:
• 1 Photoshop file (5830 x 4165 px)
• This help PDF file

1. PHOTOSHOP FILE
You will find the following file:
• **A4 Document Folder Mockup.psd**

**The Layers and The Smart Objects**
There are 4 different Group layers - one for each folder mockup on the file, as you can see in the legend on the left.

In each group you can double click to open the folder.
The smart object layer are identified by this **icon**:

There are 4 different smart objects in this scene:
• **Front Cover**
• **Back Cover**
• **Side Flap**
• **Bottom Flap**

UPDATE: V2 now includes 2 more smart objects:
• **Inside Left**
• **Inside Right**

You just need to edit **one** of each type to update it all appearances in the scene. So for example, in Folder Stack Back group, you just need to edit one of the Back Covers smart object layer to update all Back Cover objects.

To edit the smart object just double click on the **icon**.
It then opens a window with the respective part of the folder. Then just paste your design and adjust it to fit correctly. Next close and save the document and it updates all appearances in the scene.
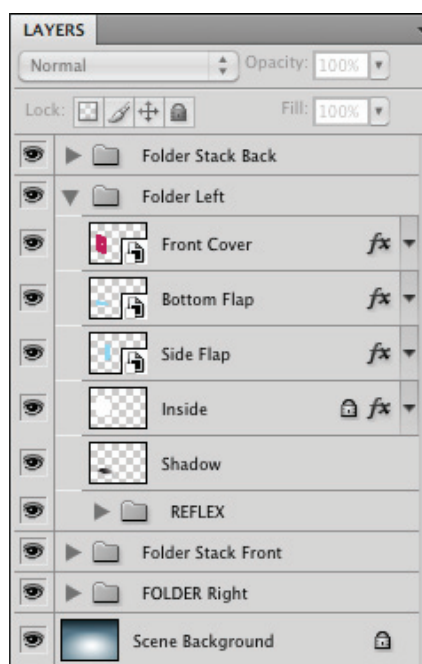

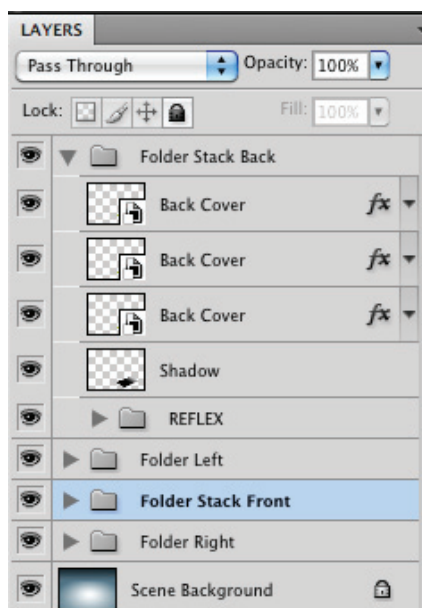

Notes:
• *In the Flaps smart objects you can use the base layer as a clipping mask. To do this just put your design above the base layer and select Layer> Create Clipping Mask from the menu.*
• *The bottom Flap smart object is upside down because of the folder layout (see above picture) don't forget to rotate your design when pasting in this smart object.*

In each layer group there is a **Shadow** layer. This represents the shadow of each folder. You can change its transparency to increase or decrease the effect.

In each layer group there is an **REFLEX** group. This is where the reflection of the folder is. You can change its transparency to increase or decrease the effect.

UPDATE Note:
• *This new version now includes 2 new smart object layers - Inside Left and Inside Right. This 2 new layers allow you to include designs for the inside of the folder. If you don't want to use any design, just edit the laters and fill them white.*

I hope you enjoy using this template. Please, don't forget to rate it! If you have any questions, please leave me a message on Envato.
Thank you!
